### About

A passionate Full Stack Developer focused on building robust and efficient web solutions using modern technologies. I have a strong interest in the decentralized space and Web3, with the ability to integrate these technologies into practical applications. My foundational engineering skills are validated by a Software Engineer Intern  certification from HackerRank, reflecting my commitment to technical excellence.

### Education

**Bachelor's Degree - Informatics Engineering**

10/2023 – 09/2027

Muhammadiyah University of Cirebon

### Experience

**Full Stack & Blockchain Developer**

01/2023 – Present | Remote

Self Employed

- Developed and deployed smart contracts using Solidity on Ethereum and BSC.
- Built and maintained DeFi protocols, NFT marketplaces, and Web3 applications.
- Integrated blockchain solutions with front-end frameworks like React and Node.js.
- Optimized smart contract gas efficiency and enhanced security to prevent vulnerabilities.
- Worked with IPFS, The Graph, and other Web3 tools for decentralized storage and indexing.

### Skills Tech

#### Programming Languages

- JavaScript, TypeScript, Python, PHP, Go

#### Tools, Platforms & DevOps

- Git, GitHub, Docker, Nginx
- PostgreSQL, MySQL, MongoDB, SQLite, Redis, Oracle
- AWS, Firebase, Vercel

#### Frameworks & Libraries

- React, Next.js, Node.js, NestJS, Express.js
- Vue.js, React Native, Vite, Laravel
- Tailwind CSS, Framer Motion, Socket.io
- Prisma, Drizzle

### Certificates

Software Engineer Intern (HackerRank) 

Advanced React (Meta) 

IBM AI Developer (IBM) 

Complete DApp - Solidity and React (Packt) 

### Languages

**English**

Professional

**Indonesia**
